Subject: Topics for upcoming AF Summit - soliciting ideas [by 7May ?]

All: Angeles and Lily are going to attend the "Air Force Western Regional Environmental Restoration Summit" on 22 & 23 May 2019 in Phoenix. This is an annual meeting where senior AF program folks meet with HQ and Regional managers. In the past, this has been an opportunity for some very productive conversations and a frank exchange of information and ideas. I am unable to attend due to skeletal limitations but am looking for additional input to include in Angeles' formal remarks. So if you have any high level or site specific issues that rise to the level of such a meeting, please share with me by Tuesday next week (07May). Give me a call or send me an email to discuss. Regards, Harry

So far, I have collected the following in no particular priority order:

- 1) PFAS and VI issues at AF sites remain a priority
- 2) Consolidation of 5YRs at multiple OU sites is worth the investment (Edwards AFB pilot)
- 3) Edwards Technical Working Group approach is a positive investment
- 4) Impact of CA Toxicity Rule (ARAR or TBC question)
- 5) EPA RAF contracting transition
- 6) Site Issue: Williams (ST12 potential VI issue; and the need for additional monitoring wells to ensure continued plume capture during the Enhanced Bioremediation Pilot)
- 7) Site Issue: Mather AFB (Site 23 - subject of ongoing informal dispute - AF wants to close Site 23C, but PCE soil gas contamination and VI is not addressed in the ROD remedy.)
